GLOBAL CYBERSECURITY TRENDS & IMPLICATIONS

PRESENTER: Niel Harper Chief Information Security Officer UNOPS **DIGITAL TRANSFORMATION**

Organizations across the board are undergoing digital transformation in order to deliver products and services more efficiently, transparently, and cost effectively. This has drastically increased cyber risk exposures.

SKILLS SHORTAGE

There's a massive skills shortage to defend against existing and emerging cyber threats. Industry analysts predict as much as 3.5 million unfilled cybersecurity jobs by the end of 2022.

BUDGET CONSTRAINTS

Despite the alarming frequency of data breaches and cyber crime, research shows that there is still not enough money – or attention – being paid to cybersecurity across organizations.*

COMPLEX THREAT LANDSCAPE

Recent events – the adoption of remote work, rapid shift to the cloud, supply chain attacks, and more – indicate that the threat landscape is now more complex than ever.

RESILIENCE

Resilience comes through collaboration and cooperation, including information sharing, joint incident response exercises, workforce development, and learning from corrective actions, among others.
